

# WEIGHT STACK PINS

## THE CORRECT WEIGHT STACK PIN FOR THE CORRECT MACHINE

When you originally purchased your **BODY MASTERS** selectorized machine, it came with the correct size **BODY MASTERS** weight stack pin.

In the interest of safety, it is imperative that only the correct weight stack pin be used with your machine. Failure to insure a proper matching of the weight stack and pin could result in product failure, or even worse, serious injury to the user.

Please carefully check your machine/s to insure that the proper pin is being employed. Keep in mind that **BODY MASTERS** has produced (5) different sized weight stacks requiring different-sized pins.

To assist you in this inspection/verification process, please refer to the following diagrams which illustrate the (5) basic weight stack designs and their corresponding pin sizes.

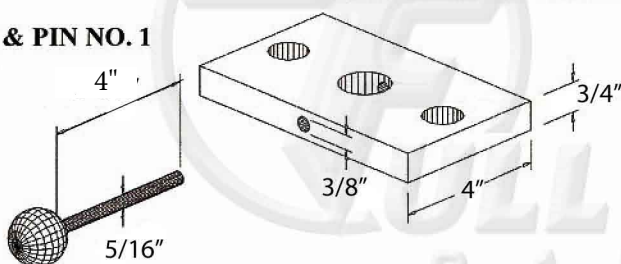

**BODY MASTERS WEIGHT PLATE/PIN SIZE DIAGRAM A**

WEIGHT STACK PLATE SIZE			WEIGHT STACK PIN SIZE			Full Circle Padding Part Number
THICKNESS	WIDTH	HOLE SIZE	DIAMETER	SHAFT	LENGTH	Full Circle Part Number
3/4"	x	4" (3/8" i.d.)	5/16"	x	4"	FW740
5/8"	x	5" (5/16" i.d.)	1/4"	x	3-1/2"	FW713
1"	x	3" (7/16" i.d.)	3/8"	x	4"	FW741
1"	x	6" (7/16" i.d.)	3/8"	x	5-1/2"	FW742
3/4"	x	6" (3/8" i.d.)	5/16"	x	5"	FW716

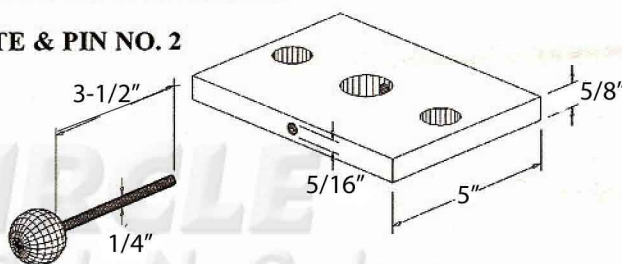

If you no longer have the original weight stack pin/s that came with your **BODY MASTERS** machine/s, notify our Parts Department for the proper replacement pin/s.
